Hemerocallis Publication by J. B. S. Norton

MARCH 1953

Price List for Spring, 1953

J. B. S. Norton, 4922 Fortieth Place, Hyattsville, Md.

Prices are for divisions shipped prepaid on orders of \$2.00 or more, 25 cents more on each smaller order; 10% less for delivery at the garden or on orders of \$10 or more shipped.

A * marks one of the best in our garden; ** one of the 100 best in the Hemerocallis Society poll. Figures after the names show the usual height in feet. EE indicates very early blooming, E, late spring; EM, early summer; M, midsummer; L, late summer; VL, very late summer or autumn. The colors given include related colors.

There are several hundred newer daylilies in the garden in too small quantities to list. I might spare a few. What would you like to have?

Visit the garden about May 20 to see most of the early hemerocallis in bloom; June 15-20 for new seedling Japanese iris flowers; July 10 to 20 is the peak of bloom for the hundreds of summer flowering daylilies, and soon after, *Lilium superbum* wild among the iris. In mid August to October our new late hemerocallis hybrids are in flower.

For good shade plants see the many kinds of plantain lilies, July to fall, their wonderful leaves earlier also.

Hemerocallis seeds; \$1.00 for 300 seeds, general mixture; \$1.00 for 100 seeds, best varieties mixed; \$1.00 for 50 seeds of 5 kinds, names and color given.

Select unnamed seedlings 50 cents each. Discards not for sale.

The best way to know what you want is to see them in bloom. Come out Rhode Island Ave. from Washington, D.C. turn sharply left at the first traffic light in Hyattsville, and about 3 blocks is the garden with thousands of different ornamental plants; or in coming south find us a block south of the Sanitary Commission buildings. Call WA 7-0878.

Originated in This Garden

Albert Gorham, 1949. 5-6, M, large bold flowers, deep red and orange red.	\$2.00
Arabian Shiek, 1952. 2-3, M, near light scarlet, wider petals than ordinary reds.	3.00
*Artemis, 1949. 2-3, M, light yellow, the wide petals wider near the rounded apex. One of my very best.	4.00

Bright Eye, 1948. 3, L, yellow, rose red halo	1.50
Carol Ann, 1949. 4, EM, old rose and light yellow bicolor.	1.50
*California, 1949. 2, VL, orange yellow self; one of the latest.	4.00
Colonel Besley, 1945. 2, VL, orange brown, large dark brown patches on the segments, unusually wide for such a late bloomer.	2.00
Colonial, 1946. 2, EM, light buff, pale purple eye.	1.00
*Damozel, 1943. 2, M, small pink self, seedling of Dorothy Dawn, unique.	2.50
*Decoration, 1948. 3, M, brilliant red with strong, near white mid-stripe.	3.00
*Dorothy Dawn, 1941. 3-4, M, large creamy pink, lily-like flower; out of non pink ancestry.	2.50
*Elizabeth, 1941. 2, EE, orange; often the best earliest.	1.00
Forerunner, 1952. 2, EE, sometimes the earliest. Nearly all early daylilies have closely clustered flowers, but this has a much branched inflores- cence. The petals are long tapering.	2.00
Genevieve, 1941. 3, EM, faint eyed orange.	1.00
*Great Light, 1953. 3, M to L, Very large almost white flowers open about 24 hours from late p.m. Ideal for house use at night. Long bloom season.	5.00
*Hidden Glow, 1949. June and Sept. to Nov., 2-3, light buff, sometimes a red glow in the throat, which in certain weather may extend nearly to the petal apex.	1.50
Havilah, 1945. 3, M, bright yellow, like Golden West, but better here.	2.00
Jimmie Junior, 1942. 2-3, M, wide open, iris-like, dark rose red.75
*Mae (Norton), 3-4, EM, pink and rose.	2.00
**Mongol, 1939. EM to L, very large yellow, long season.	2.00
Mrs. Jones, 1938. 2, E, yellow. About five % of the flowers are double, three types of doubles. When there are 10 to 12 segments in a ring, the flowers resemble those of certain cacti. Sev- eral clumps needed to be sure of doubles.75
*Ortencia, 1946. 3. EM and later, large yellow self of beautiful form.	2.00
Orange Rex, 1946. 5-6, M, orange; selected for height.	1.00
Prevernal, 1949. 2, EE, yellow star, often the earliest, and again in autumn.	1.50
Ruth, 1946. 2, E, orange buff, faint red marks low on petals.50
Sister Sallie, 1945. 3, M, cream and pink pastel, beautiful design, and better still in part shade.	2.00
*Winemaker, 1952. 3, VL, small, full, wine purple flowers, early Sept. to frost.	5.00

Woodridge, 1938. 2-3, EM and at various other times, sepals yellow, petals dark blood red to brown. Although the flowers are open from before sunset until after dark the next day, the best time to adore them is from sunset to early a.m. 1.00
